Professional Summary

Computer Science student with strong backend and systems experience, currently focused on AI and machine learning. Seeking an AI Engineer internship to build and apply data-driven models in real-world applications.

Education

Bachelor of Science in Computer Science

Karachi, Pakistan

FAST National University of Computer and Emerging Sciences

Aug 2023 – Present

- **CGPA: 3.46/4.0**
- **Relevant Coursework:** Artificial Intelligence, Machine Learning, Recommendation Systems, Data Structures, Probability & Statistics, Database Systems

Higher Secondary Certificate (HSC)

Karachi, Pakistan

Adamjee Govt. Science College

2021 – 2023

Experience / Projects

CineMatch: Movie Recommendation System | *Python, NumPy, Pandas*

Feb 2026

- Developed a personalized recommendation system using collaborative filtering and cosine similarity.
- Applied Principal Component Analysis (PCA) to reduce dimensionality and improve system efficiency.
- Constructed a user-item matrix consisting of **900+ users and 1,600+ movies** to generate top-N personalized recommendations.
- Processed and analyzed the MovieLens dataset (100k+ ratings) for model validation.

ERP Accounting System | *Next.js, Prisma ORM, PostgreSQL*

Aug 2025 – Sept 2025

- Built a web-based ERP system under the supervision of **Prof. Nadeem Kafi** at FAST-NUCES.
- Architected 5+ financial modules (assets, liabilities, revenue) with relational schemas for 10+ entities.
- Improved accounting workflow efficiency through automation and structured data management.

OREZ – Collaborative Version Control Platform | *React, Vite, TailwindCSS*

- Developed a Git-inspired platform for repository management and file-change tracking.
- Implemented snapshot-based versioning with efficient storage and retrieval of file states.
- Designed a responsive UI for commit history visualization and intuitive user interaction.

Peer-to-Peer Chat System | *C++, Linux Sockets, Multithreading*

- Engineered a decentralized communication system using C++ and Linux sockets.
- Implemented concurrent connection handling using multithreading to enable real-time message exchange.
- Programmed a terminal-based interactive UI using ncurses for dynamic message rendering and user input handling.

Certifications

Mathematics for Machine Learning: PCA

Feb 2026

Imperial College London (Coursera)

- Mastered dimensionality reduction using PCA and matrix operations (eigenvalues/eigenvectors) via NumPy.
- Performed feature extraction and data transformation on real-world datasets. **ID: MFTXWJQKEA9S**

Technical Skills

Languages: Python, C++, C, JavaScript, SQL

AI/ML: NumPy, Pandas, Recommendation Systems, PCA

Web Development: Next.js, React, Node.js, Prisma ORM, REST APIs

Systems & Databases: Linux, Sockets, Multithreading, PostgreSQL, MongoDB

Tools: Git, GitHub, Vite, TailwindCSS
